DETAILED ACTION

Drawings

1. The drawings filed October 15, 2003 appear to be formal and are acceptable.

Allowable Subject Matter

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art fails to render obvious the claimed digital receiver for use in radar systems including, inter alia, an intermediate frequency (IF) converter to translate a higher frequency 1st IF to a lower frequency 2nd IF, a digital signal processor (DSP) including IF (range) domain and Doppler (azimuth) domain filtering, and at least one phase history data interface, and at least one phase history output interface moves data to an image formation processor or a raw phase history storage subsystem. The prior art does show azimuth domain filtering in a radar system. However the present invention, as claimed, cannot be fairly rendered obvious by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B. Sotomayor whose telephone number is 703-306-4170. The examiner can normally be reached on Monday to Thursday from 8:30AM to 5:00PM.
